2. Lithuanian Doctors Being Conscripted.

[redacted] In February 1951, for the first time, some doctors were called into service in the city of Panevezys. (b)(1) (b)(3)

ANALYST'S COMMENT: [redacted] (b)(1) (b)(3)

[redacted] This abnormal situation indicates a proportionately larger increase in military personnel, necessitating calling up civilian doctors to meet the demand of the military.

3. Bulgaria Sends Additional Medical Supplies to Korea.

[redacted] FBIS, Far East, No. 197
3 Oct 51 [redacted] The Bulgarians have sent another shipment of medical supplies, which are enough to set up two general hospitals. The eight carloads of supplies include 190 cases of medicines, 40 cases of medicated soaps, 296 tents, 61 stretchers, and 14 vehicles, including ambulances. The Public Health Ministry is formulating a plan to make best use of these supplies. (Pyongyang, Oct. 2, 1951, 1500 GMT--B).

ANALYST'S COMMENT: In June reports were received of shipments of gifts of clothing and medical supplies, collected by Bulgarian people and sent to Korea (date of information May 1951). This report appears to be an official shipment of large amounts of medical and hospital supplies. Equipment for two general hospitals decidedly increases available medical facilities very much needed by Communist forces in Korea.

Based upon previous reports of shipments of similar supplies from Bulgaria and the other Satellite countries to Korea, it is reasonable to evaluate this report as probably true.

 (b)(3)

4. [redacted] (b)(1) (b)(3)

5. First Women's Military Unit in Egypt to Train Fifty Field Nurses.

(b)(1) (b)(3) [redacted] The Daughters of the Nile, a large women's organization, voted today to organize the first women's military unit in Egypt to consist of fifty girls recruited from the organization. The society voted also to train immediately fifty field nurses, and to give first-aid training to 2,000 women.

ANALYST'S COMMENT [redacted] (b)(1) (b)(3) There have been no reports of outbreaks of disease or any breakdown in existing medical facilities necessitating training of this group for normal peacetime needs. Daughters of the Nile appears to be a leftist organization, with its sponsor, Doria Shafik having leftist tendencies. The mental and moral upbringing of the Egyptian woman precludes her entrance into the field of nursing under ordinary conditions.
